

phenyl, and wherein any phenyl moiety may have up to three substituents chosen from among hydroxy, carboxy of 1-4 carbons, halo, alkoxy of 1-4 carbons, alkyl of 1-4 carbons, or alkenyl of 2-4 carbons and wherein any alkyl may be a straight chain, branched chain, or the alkyl may be wholly or partially cyclized, in a pharmaceutically acceptable carrier, wherein said 5-androstene-3 β ,17 α - diol or ester or ether thereof is part of a cyclodextrin inclusion complex.

REMARKS

By the present amendment, claims 15 and 19 have been amended to delete reference to "a tumor proliferation inhibiting effective amount of". No new matter has been added.

Turning now to the Official Action, claims 15-20 are rejected under 35 U.S.C. §112, first paragraph, allegedly because the specification, does not reasonably provide enablement for the term "tumor proliferation". Applicants maintain that ample support may be found in the specification, and in the knowledge available to one of ordinary skill in the art, to practice the claim invention without the need for undue experimentation. Nevertheless, without conceding to the Examiner's arguments, in an effort to expedite prosecution these claims have been amended to remove the phrase "tumor proliferation" without prejudice or disclaimer, thus rendering this rejection moot. Withdrawal of this rejection is thus respectfully requested.

From the foregoing, further and favorable reconsideration in the form of a Notice of Allowance is believed to be next in order and such action is earnestly solicited.

Application No. 09/255,499
Attorney's Docket No. 032915-005
